CHATRIUM HOTEL RIVERSIDE BANGKOK AND CHATRIUM RESIDENCE SATHORN BANGKOK RECEIVED G-GREEN (GOLD) AWARD 2017

Bangkok, February 2018: We are proud to announce that Chatrium Hotel Riverside Bangkok and Chatrium Residence Sathon Bangkok have claimed the G-Green (Gold) Award for 2017. The award for being an eco-friendly hotel was presented by General Surasak Karnjanarat, Thailand's Minister of Natural Resources and Environment, at the Department of Environmental Quality Promotion. It was the second time the Chatrium Hotel Riverside Bangkok and Chatrium Residence Sathon Bangkok have received this award since 2015.

Chatrium Hotel Riverside Bangkok and Chatrium Residence Sathon Bangkok are strong advocates of environmentally friendly practices. They received the Golden Level green hotel award for 2017 in recognition of their many eco-friendly measures, including a program to deliver daily amenities to customers in 100% tree-free packaging.

Chatrium Hotel Riverside Bangkok and Chatrium Residence Sathon Bangkok have carefully crafted an ecologically aware collection of guest room amenities for the properties, as they recognize that is their responsibility to help both the country and the global corporate community to preserve the planet's resources. All items are "Tree Free" and made from stone paper, an ultra-sustainable and eco-friendly paper-like material made from stone remains. In addition, all accessory items are packaged in tubes and sachets that have been carefully selected and manufactured with biodegradable and sustainable d2w® controlled-life additives. Conditioning shampoo, shower gel and body lotion are paraben-free, SLS-free, produced without animal testing and approved by the Thai FDA (Food and Drug Administration). It is through these efforts that Chatrium Hotel Riverside Bangkok and Chatrium Residence Sathon Bangkok fulfills, in part, its responsibility for the global environment.

"We are greatly honored and pleased to receive the G-Green Golden Level award from the Ministry of Natural Resources and Environment. We continually strive to maintain and improve upon the eco-friendly measures we have already put in place. We always consider our promise to "Think First Think Earth" when considering any action that might impact the environment. The Green Hotel (Gold) Award is outside recognition of the continual striving for sustainable actions by Chatrium and is most appreciated", said Mrs. Savitri Ramyarupa, Managing Director of Chatrium Hotels & Residences.
