June 26th 2017

June 26th, 2017, Bangkok – Armelle Le Bihan, founder of Green Building Consulting & Engineering, an award-winning company providing design consultancy and building performance analysis to assist companies in designing high asset value buildings, recently gave a talk at the 1st Joint Chambers Sustainability and CSR Fair held at the FYI Building in Bangkok.

Together with Virgine Hochard, Design Manager of Archetype, Armelle spoke about combining architectural vision and engineering skills early on in the design process of GEM Olympic Leisure Center in Ulaanbaatar, Mongolia, resulting in a high performance green building, which minimizes energy consumption and protects the environment and people.

The 1st Sustainability and CSR Fair was organised by the Franco Thai Chamber of Commerce (FTCC) CSR & Sustainability Committee in conjunction with the Netherlands Chamber of Commerce (NTCC) and the German Chamber of Commerce (GTCC) with the support of the Canadian Chamber of Commerce (CANCHAM), the Australian Chamber of Commerce (AUSCHAM), Ananda Development and Sasin Center.

## About Green Building Consulting & Engineering

Green Building Consulting & Engineering is an award-winning Thailand based company providing design consultancy and technical analysis to facilitate project teams in the design of high asset value buildings that improve people's well-being while preserving the planet.

With compelling arguments from increased ROI to enhanced occupant health, we understand that on top of saving the planet, Green Buildings are a strong business asset. Engineered along your company values, we create high performance buildings by defining your sustainability strategy, optimizing your design and complying with international certification standards.

We have been conceiving, designing and optimizing office, educational, medical, industrial, cultural and hospitality Green Building projects in France, Taiwan, Hong Kong, Singapore, Mongolia and Thailand.
