Bangkok Golf Centre presents Customised 3D Club Fitting – Optimising Your Game to the Next Level

An important element of the quest to a better overall game is to ensure that equipment is well-suited to the player, and that it is helping rather than hindering improvement. Bangkok Golf Centre is pleased to announce our unique collaboration with Big Fish Golf International, a professional fitting studio that truly understands the subtle differences in building clubs for players from diverse cultures with different physical conditions and abilities

Utilizing knowledge gained from years of active involvement with professional golfers, the Asian and European tours, Bangkok Golf Centre (BGC) offers PGA tour level club fitting services with a unique 3D dimensional approach to fitting which includes the use of K-Vest and Trackman Pro IIIe. The use of these specialized equipment allows us to fit any player of different level of proficiency. The information analysed by Trackman Pro IIIe and K Vest can then either be translated by one of our golf instructors at BGC or if you are already taking lessons with us, your golf instructor will use that data to help optimize your game with the right equipment.
