Bata continually takes part in Bata Children’s Program

As part of it’s extensive CSR work, Bata took part in a recent sanitation program for children in Banbueng School at Pathumthani province. As part of this initiative, the international shoe manufacturer sent doctors from the Huachiew Chalermprakiet University Clinic to give 130 students dental check-ups and teach them about oral health and hygiene. Bata also provided oral care supplies, snacks and lunch for the children as well as a 10,000 THB scholarship.
