Full story

As a new generation floods the job market, there is increasing focus on delivering superior experiences to both employees and customers. Enabling the workforce with better technology, including the right monitors is a way to heighten employees experience which in turn impacts customer experience². The proliferation of data gives rise to a demand for better visualization tools. Research³ shows that there is growing demand for larger screen size, better support for multitasking, higher resolution monitors and a clutter-free work area to enhance the visualization of data. As demographics change and millennials become professionals, visually appealing monitors that help in productivity will be key to attract and retain the best talents.

As the world's No. 1 monitor brand⁵ Dell is meeting the demands of the future workforce with its new range of Dell UltraSharp monitors, featuring innovative design and technology to drive productivity with ultimate screen performance and an outstanding user experience. The new monitors are designed to cater to users in financial services and insurance, trading floor, financial analysis and accounting, media post production, programming and engineering.

The Dell UltraSharp 32 4K USB-C and 34 Curved USB-C monitors come with significant features. Picture-by-Picture allows for multi-tasking content from two different PCs. A built-in keyboard, video and mouse (KVM) help users toggle between and edit content using a single keyboard and mouse. This new portfolio of UltraSharp monitors also offers convenient USB-C connectivity that charges the connected laptop while transmitting data and video signals, all from one single cable to reduce cable clutter.

Designed with productivity in mind, the following features come as a standard in all UltraSharp monitors:

- Fully adjustable stands for user comfort—height, tilt, swivel and pivot⁶
- Flicker-free screen and ComfortView, which reduces blue light emission to optimize eye comfort

- Easy Arrange on Dell Display Manager software to organize multiple applications for multi-tasking efficiency
- Premium Panel Exchange⁷
- Dell's three-year Advanced Exchange Service⁸

"As the world's favorite monitor brand⁹, Dell continues its legacy of leading innovation with multiple firsts in the industry," said Kirk Schell, senior vice president, Dell Displays & Engineering. "With the new UltraSharp family, we remain committed to providing the best to meet the visualization needs of our commercial customers."

Dell UltraSharp 32 4K USB-C Monitor (U3219Q) shows brilliant color and clarity

Experience outstanding screen performance in amazing detail with Ultra HD 4K resolution – four times more detail than Full HD. VESA certified DisplayHDR™ 400 supports HDR content playback for stunning, true-to-life images. Images appear in living color revealing details that were previously tough to see with up to 400 nits of brightness (typical) and a color depth of 1.07 billion colors. Complementing the vivid monitor is the virtually borderless InfinityEdge for an edge-to-edge viewing experience.

Dell UltraSharp 34 Curved USB-C Monitor (U3419W) provides immersive and exceptional performance

Discover precise performance and an immersive experience on this 34-inch curved USB-C monitor that elevates both work and entertainment. The ultra-wide 34-inch curved screen (WQHD (3440 x1440), IPS technology) with 21:9 aspect ratio offers a large onscreen space, ideal for multitasking, and built-in dual 9W speakers to complete the experience from sight to sound.

Dell UltraSharp 24 and 27 USB-C monitors (U2419HC and U2719DC) designed for performance

See details and accurate, true-to-life color on the beautifully crafted UltraSharp monitors. The Dell UltraSharp 24 and 27 USB-C monitors each feature a thin side profile and small monitor base to optimize desk space, perfect for shrinking modern office spaces. The virtually borderless InfinityEdge bezel delivers an edge-to-edge viewing experience, ideal for a seamless multi-monitor set up. The new 24-inch (FHD) and 27-inch (QHD) monitors come with two different options, with and without USB-C connectivity, for superb screen performance in an innovative design.

"It's amazing that Dell is so far out front on the monitor scene," said Jon Peddie, president at Jon Peddie Research. "Dell's expanding displays portfolio highlights the company's vision of meeting every customer's displays needs."
