

DELTA EV CHARGERS ENHANCING THAILAND'S EV CHARGING STATION INFRASTRUCTURE

The President of Electric Vehicle Association of Thailand (EVAT), Associate Professor Yossapong Laoonual, visited Delta's Electric Vehicle (EV) charger exhibition booth at the contract presentation event for "Thailand's Funding Support for Charging Stations" government program to 35 organizations at the Infinity room in Pullman Bangkok King Power Hotel. The team was greeted by Mr. Kittisak Ngoenngokngam, SEA Business Director of Delta Electronics (Thailand) PCL. The event was organized by The Energy Policy and Planning Office (EPPO), Ministry of Energy; and EVAT to showcase selected suppliers' products to potential companies that are benefiting from the government program.

Delta has been one of the world's leading companies in R&D, design and production for Delta EV chargers which become the preferred choice for many top tier automotive brand names from Europe and USA. The "Thailand's Funding Support for EV Charging Stations" government project aims to promote investments in EV charging stations and quality infrastructure for EVs in the near future and to enhance the public's confidence in using EVs in Thailand.
