

DELTA LAUNCHED ENERGY SAVING INNOVATION AND PRODUCTS IN “THAILAND ENERGY EFFICIENCY WEEK 2017”

To promote Thailand as ASEAN hub of energy technology, Delta Electronics (Thailand) PCL. together with Delta Electronics, Inc. (DEI) – the world’s leading electronics, energy and ICT innovators, led by Mr. Gordon Kuo, DEI’s Sales Director, launched Delta’s energy saving products and innovations in the Thailand Energy Efficiency Week 2017 at Impact Exhibition & Convention Center. The event which was packed with visitors has been ASEAN’s biggest international exhibition for energy management and technology.

Delta’s world-class innovation and products are developed in its state-of-the-art R&D facilities around the world. The company’s products and solutions are recognized worldwide for their market leading technology, high efficiency and reliability in contribution to a lower carbon footprint environment. Delta’s wide range of products includes LED lighting, highly efficient power electronics, EV charger and photovoltaic inverters among many others. These products can contribute directly to the development of Thailand 4.0 vision.
