More about hot stone massage at Spa Cenvaree…
Hot stone is a massage technique used throughout the world, especially in Asia. Besides just feeling great, this treatment has a range of therapeutic benefits too, as the hot stones pressed against specific areas of the body help to open up our natural 'Merdian' system (energy pathway).
This effect can help with those suffering from short or long-term muscular aches and pains, while also ease some of the symptoms of stress, anxiety, depression and circulatory problems.
