

# Let's Conserve the Environment with Amari Pattaya

To celebrate Earth Day, Amari Pattaya invited the management of the hotel and all of its guests to participate in a tree planting event to protect and preserve the environment.

Beyond what the clients and the public know about this activity, we also engaged our team members and guests to become aware of environmental concerns by creating the activity called "My Cup My World".

It was a success as all members brought their own drinking water glass during lunch time.

We can plant our favourite trees not just on Earth Day, but also every day at home! We can green the planet.
