

MEA visited Delta Electronics to observe EV innovation & renewable energy

Metropolitan Electricity Authority's (MEA) led by Mr. Vitcha Chakornpipat, Research & Development Director, visited Delta Electronics (Thailand) PCL. for observation on Electric Vehicle (EV) charging technology, renewable energy solutions and advanced datacenter infrastructure solution at Delta's headquarters in Bangpoo. The MEA team was welcomed by Mr. Kittisak Ngoenngokngam, Delta's SEA Business Director and Mr. Johnny Tam, Director of Business Development.

With a clear mission for sustainable growth, Delta Electronics (Thailand) PCL. has been a global company publicly listed in Thailand. The company has R&D centers in 10 countries, sale offices in more than 19 countries and manufacturing plants in 4 countries. Delta's products and innovations have been recognized worldwide for its quality, efficiency and reliability. The company's total revenue in 2016 was 46,887 million baht. With customers from leading EV companies in Europe and USA, Delta is one of the key pioneers in research and development for EV components and charging system for over a decade.

Sustainability development has been a key part of Delta's mission and operations since its founding. Delta is already producing more than 793 MWh of electricity per year from the solar energy solution installed in its factories' rooftops and car parks.
