About Green Building Consulting & Engineering

Green Building Consulting & Engineering is an award-winning Thailand based company providing design consultancy and technical analysis to facilitate project teams in the design of high asset value buildings that improve people's well-being while preserving the planet.

With compelling arguments from increased ROI to enhanced occupant health, we understand that on top of saving the planet, Green Buildings are a strong business asset. Engineered along your company values, we create high performance buildings by defining your sustainability strategy, optimizing your design and complying with international certification standards.

We have been conceiving, designing and optimizing office, educational, medical, industrial, cultural and hospitality Green Building projects in France, Taiwan, Hong Kong, Singapore, Mongolia and Thailand.
