Movenpick Asara Resort & Spa Hua Hin goes GREEN to protect ocean ecosystem

Movenpick Asara Resort & Spa Hua Hin recently encourages team members and guests to eliminate the use of single-use plastics and encourage all to reduce waste, reuse and recycle to help protect the ocean and town's ecosystem.

Since its rebranding in August last year, the hotel has implemented and started to act with "one act of change" as we believed even one act but the effect on reducing plastic waste will be monumental.

From now on, all the drinks will be served with environmentally-friendly corn straws which will only provide upon request. Movenpick Asara Resort & Spa Hua Hin is committing to ensure sustainability and environmental protection on a local scale. Start with one act, we can make a real difference in plastic consumption reduction on a global scale.
