Volvo Trucks introduces the latest innovated technology trucks

Mr. Eric Labat, President of Volvo Trucks (Thailand) recently held a press conference introducing safety features and preventive safety technology systems in Volvo FH tractor model aiming to increase the road safety standards in Thailand is a part of Volvo Trucks' social responsibility as the world's leading truck manufacturer. It also helps transport operators maintain valuable resources like drivers and the goods being transported to arrive at any destinations with maximum level of safety.

Seen, Mr. Labat (6th from standing left) together with other management members took picture with journalists who attended the press conference and did a test drive for the latest safety features.
