Wyndham Grand Phuket Kalim Bay won “Silver Level” at the Thailand Green Hotel Award 2019

December 2019 – Wyndham Grand Phuket Kalim Bay ends the year 2019 with winning of the “Silver” Green Hotel Award at the Green award ceremony organized by Thailand’s Department of Environmental Quality Promotion and Ministry of Natural Resources and Environment.

Winning this prestigious national award is a testament to the hotel’s persistence and dedication to promoting several of its green initiatives, as well as to the tireless work of all team members.

Throughout the year, Wyndham Grand Phuket Kalim Bay has integrated green initiatives into every aspect of the hotel operations, from overall energy and water saving, reducing unnecessary single-use plastics, choosing recycled goods and biodegradable products through selective suppliers, recycling of material waste from hotel outlets and guest rooms, campaigning for hotel guests and team members to participate in several sustainable programs to support our environment and our local community.

For the year 2020, Wyndham Grand Phuket Kalim Bay aims to introduce three sustainability projects; renewable energy- turning sunlight into electricity by solar cells, guest room air-condition management to reduce energy consumption and tackle further single-use plastic within the hotel where possible.
